COURSES

1. Mern Full stack development - April 2025

PROJECT

Online Movie Streaming Application (Desktop Application) (2024)

An online movie streaming application is a digital platform that allows users to watch movies and TV shows over the internet without needing to download them.Popular examples include Netflix, Hulu, Amazon Prime Video, and Disney+.

This application is based on flutter framework it is used to create natively compiled applications for mobile, web and desktop from a single codebase.

Dart is programming language .

The syntax of Dart is clean and readable, and is influenced by languages such as C,Java, and JavaScript. It includes familiar language structures such as classes, interfaces,

Graphic designer portfolio (website)

Graphic designer protfolio is the website where you can get client by seeing your designs through website.

This website is based on html ,css, javascript , database used to create it.

AUTOMOTIVE CAR PARTS, SQL

The Automative Car Parts Management System is a database project designed to manage and track car parts, suppliers, cars, and orders. The system provides a structured way to store and retrieve information related to the inventory of car parts, suppliers, associated cars, and orders made for parts. it uses SQL to perform various operations, such as retrieving data, analysing, orders, and linking parts to cars and suppliers. The objective of this project is to design a relational database to simulate an inventory and order management system for the automotive industry. The database enables seamless tracking of car parts, their suppliers, the cars they are compatible with, and orders placed for these parts.
